Jancik Glass
CUSTOM LIGHTED SCULPTURES

Jancik Glass makes custom stained glass lamps embedded with natural Brazilian agates.

Each agate is carefully chosen to complement the earth tones in the stained glass perfectly. When lit, Jancik Glass agate lamps come alive with the earth's majestic glow, creating a soothing light that makes a stunning room accent, as well as a unique conversation piece.

Agate, one of the world's most strikingly beautiful semiprecious stones, is found in geodes within volcanic rock or ancient lavas. A chalcedony, agate is a member of the quartz family and is generously endowed with colored bands and other markings influenced by changes in pressure, temperature, and mineral content during the formation process. Since ancient times, agates have been associated with love, courage, good luck, healing, protection, and longevity. No two pieces are alike.

An agate's natural color of brown, red, and gray comes from its iron oxide and manganese mineral content. All

other colors are the result of an involved process of heating and dyeing, resulting in a variety of stunning colors.

Jancik one-of-a-kind agate lamps are handcrafted in the United States, are signed, and come with a Certificate of Authenticity. All lamps stand 14–16" H, including base. Larger lamp bases measure 6½" W x 13" L x 4" H; smaller lamp bases measure 7" square x 4" H. To change the lightbulb, simply lift the lamp off the base. Use **only** compact fluorescent or LED bulbs of 60 watts or less; **do not** use conventional lightbulbs. All lamps include in-line switch wiring.
